CLOUD+ KEY DIFFERENTIATORS

DevOps domain

At the time of its release, Cloud+ will be the only CompTIA certification with a domain dedicated to DevOps.

DevOps is a critical approach in the world of cloud computing and IT operations, which emphasizes automation, collaboration, and faster, more efficient software development and deployment.

As cloud computing continues to play a central role in modern IT infrastructure, understanding DevOps is crucial for systems administrators to effectively manage and optimize cloud-based environments.

Cloud security

Today, every tech job has a cybersecurity component. Cloud security is crucial because it safeguards sensitive data and ensures compliance with stringent regulatory requirements, amidst an ever-evolving landscape of cyber threats.

The emphasis on security within the Cloud+ certification is essential, not only addressing the critical demand for robust cloud security measures, but also enhancing the value and relevance of the Cloud+ certification in today's cloud-centric IT industry.

PREREQUISITE COURSES AND KNOWLEDGE

Learners should possess 5 years of tech experience. Ideally 2-3 years of that experience would include networking or systems administration.

WELL-PAYING POSITIONS

The median pay for network and computer systems administrators is \$95,360, which is nearly double the median national wage (\$48,060) of all occupations. ¹
